Professional Summary

Computer Science student skilled in Python, Linux and Docker with strong interest in backend development and DevOps. Passionate about building APIs, automation tools and scalable systems.

Education

[Sri Ramakrishna Degree College (Autonomous)] CGPA: 8.00
[Bachelor of Computer Science (B.Sc. Cs)-Pursuing]

Nandyal
2023 -2026

Technical Skills

Languages: Python, Bash, SQL.

Backend: FastAPI, JWT Authentication.

Database: PostgreSQL.

Tools: Git, Docker, Linux, Vs Code.

Projects

FastAPI Authentication API

[Home](#)

- Developed REST APIs with JWT authentication using FastAPI.
- Implemented password hashing and user login system.
- Implemented role based authentication.
- Integrated PostgreSQL database using SQLAlchemy ORM.

System Monitoring Tool (Bash)

[Pasulakarthik/Bash-Projects](#)

- Developed a Bash script to monitor CPU, memory, and disk utilization.
- Implemented threshold alerts and automated logging.

Docker Deployment Automation (Bash)

- Automated Docker container deployment using Bash scripts.
- Integrated image pull, container restart, and port mapping.

Log Analyzer (Bash)

- Parsed web server logs to extract traffic insights and error statistics.

Frontend Projects (Bigbasket & Flipkart)

[Bigbasket](#)

[flipkart](#)

- Developed a responsive clone of the Flipkart homepage using HTML and CSS.
 - Recreated navigation bar, product sections, banners, and layout similar to the original website.
 - Implemented responsive design for different screen sizes.
- Tech Stack: HTML, CSS.

Certification

- Python – Reliance Foundation Skilling Academy (2025).
- Microsoft Office – AMC Computer Institution (2018).
- Communication Skills – APSSDC (2024).

Languages Known

- English–Speak and Write.
- Telugu–Speak and Write.
