

PROFESSIONAL SUMMARY

Backend-focused Computer Science graduate with hands-on experience developing REST APIs, microservices architecture, and containerized deployments using Python, FastAPI, PostgreSQL, Docker, and JWT authentication. Proficient in SQLAlchemy ORM, RBAC, Bash scripting, and Linux environments. Familiar with SDLC practices and API design principles. Seeking an Associate Software Engineer / Developer – L4 role to contribute to scalable backend systems.

TECHNICAL SKILLS

Languages : Python, SQL, Bash Scripting

Backend : FastAPI, REST APIs, JWT Authentication, Microservices, RBAC, Pydantic, bcrypt

Database : PostgreSQL, SQLAlchemy ORM, RDBMS, SQL Queries & Optimization

Tools : Git, GitHub, Docker, Containerization Linux, VS Code, CI/CD Basics, Render

Protocols : HTTP / HTTPS , JSON, OpenAPI / Swagger

Concepts : API Design & Integration, Authentication & Authorization, CRUD Operations, OOP

PROJECTS

FastAPI Authentication API | Python, FastAPI, PostgreSQL, SQLAlchemy, JWT, Docker, Pydantic, bcrypt

- Designed and developed RESTful APIs using FastAPI and PostgreSQL following clean architecture principles.
- Implemented JWT-based authentication and Role-Based Access Control (RBAC) for secure access management.
- Integrated SQLAlchemy ORM for efficient database operations and query optimization.
- Applied secure password hashing and login session management, and input validation.
- Structured modular backend architecture to ensure scalability and maintainability.

API Link: [Home](#)

System Monitoring Tool | Bash, Linux

GitHub: [Pasulakarthik/Bash-Projects](#)

- Developed a Bash script to monitor CPU, memory, and disk utilization in real time.
- Implemented configurable threshold alerts and automated logging for system health tracking.

Docker Deployment Automation | Bash, Docker

- Automated Docker container deployment pipeline using Bash scripts.
- Integrated image pull, container restart, port mapping, and environment configuration.

Log Analyzer | Bash, Linux

- Parsed web server logs to extract traffic insights, error statistics, and usage patterns.
- Automated log analysis for performance monitoring and troubleshooting workflow.

Frontend Clones - Bigbasket & Flipkart | HTML, CSS

Webpage Link: [Bigbasket](#) [flipkart](#)

- Built responsive homepage clones of Flipkart and Bigbasket using HTML and CSS.
- Recreated navigation bars, product sections, banners and layouts with responsive design for multiple screen sizes.

EDUCATION

Bachelor of Computer Science (B.Sc. Cs)

[Sri Ramakrishna Degree College (Autonomous)] CGPA: 8.00

Nandyal

2023 -2026

CERTIFICATION

- Python – Reliance Foundation Skilling Academy (2025).
- Communication Skills – APSSDC (2024).

LANGUAGES KNOWN

- English–Speak and Write.
- Telugu–Speak and Write.
