## Professional Summary

---

Computer Science student skilled in Python, Linux and Docker with strong interest in backend development and DevOps. Passionate about building APIs, automation tools and scalable systems.

## Education

---

[Sri Ramakrishna Degree College (Autonomous)] CGPA: 7.60  
[Bachelor of Computer Science (B.Sc. Cs)-Pursuing]

Nandyal  
2023 -2026

## Technical Skills

---

**Languages:** Python, Bash, SQL.

**Backend:** FastAPI, JWT Authentication.

**Database:** PostgreSQL.

**Tools:** Git, Docker, Linux, Vs Code.

## Projects

---

### FastAPI Authentication API

[FastAPI - Swagger UI](#)

- Developed REST APIs with JWT authentication using FastAPI.
- Implemented password hashing and user login system.
- Integrated PostgreSQL database using SQLAlchemy ORM.

### System Monitoring Tool (Bash)

[Pasulakarthik/Bash-Projects](#)

- Developed a Bash script to monitor CPU, memory, and disk utilization.
- Implemented threshold alerts and automated logging.

### Docker Deployment Automation (Bash)

- Automated Docker container deployment using Bash scripts.
- Integrated image pull, container restart, and port mapping.

### Log Analyzer (Bash)

- Parsed web server logs to extract traffic insights and error statistics.

### Frontend Projects (Bigbasket & Flipkart)

[Bigbasket](#)

[flipkart](#)

- Developed a responsive clone of the Flipkart homepage using HTML and CSS.
- Recreated navigation bar, product sections, banners, and layout similar to the original website.
- Implemented responsive design for different screen sizes.

Tech Stack: HTML, CSS.

## Certification

---

- Python – Reliance Foundation Skilling Academy (2025).
- Microsoft Office – AMC Computer Institution (2018).
- Communication Skills – APSSDC (2024).

## Languages Known

---

- English–Speak and Write.
- Telugu–Speak and Write.
